

Overview

*Model title, Author names, Contact,
Study title and link, Target variable,
Scientific field, Objective*

Modelling

Response

*Training scale, Map of the
training locations, Acquisition,
Geometry, Sample size, Range,
#Classes, #Samples per class,
Sampling design, CRS,
Data sources*

Predictors

*Type, #Predictors, Names,
Preprocessing, Data sources*

Model selection

*Model validation strategy,
Performance metrics,
Validation results,
Hyperparameter tuning,
Predictor selection*

Learning method

*Model type, Algorithm,
Architecture*

Model Interpretation

*Explainability,
Scientific interpretation*

Model uncertainty

*Biases, Sensitivity assessment,
Limitations*

Prediction

Map evaluation

*Evaluation strategy,
Uncertainty quantification method*

Prediction

*Prediction scale,
Map of the prediction area,
Sampling design plot*

Post-Processing

*Post-processing methods,
Threshold selection*
